APPLICANT : MATSUSHITA ELECTRIC IND CO LTD;

INVENTOR : UENO TAKAFUMI;

INT.CL. : G11B 27/034

TITLE : DISK EDITING DEVICE

ABSTRACT : PURPOSE: To easily perform the recording of a disk interchangeable with an existing CD by generating new TOC information based on subcode information, and recording the TOC information after completing the recording.

CONSTITUTION: A main signal (a) reproduced in a prescribed order is inputted to a recording means 6, and simultaneously, a reproducing subcode (b) is converted to TNO according to a music order designated by a subcode edit means 3. Generated subcode output (e) for recording is converted to a prescribed format with the main signal (a), and is recorded on a disk 7 as a recording signal (g). Meanwhile, the start position of a track written on TOC is stored in a storage means 5 by conforming to the TNO. After the recording is completed, the TOC information, after being converted to a prescribed format by the recording means 6, is recorded on the read-in area of the disk 7 as the signal (g). Thereby, it is possible to perform the recording of the disk interchangeable with a general CD.
